INTEGRATING ACUPUNCTURE INTO THE MANAGEMENT OF MIGRAINES: A RANDOMIZED, COMPARATIVE TRIAL [Principal Investigator: Patricia Miller, L.Ac, PT; Faculty Sponsor: Hui Yan Cai, L.Ac., Ph.D ] This research is being done to study the effect of incorporating acupuncture into the management of migraine in persons taking non prescription medication. The primary aim is to determine in a randomized controlled study whether individuals experiencing migraine headaches have fewer occurrences and less intense migraines when acupuncture is integrated with nonprescription pharmacological treatment.
